Take a good look at your possibilities.

Detroit has designed, engineered and manufactured the engine, transmission and axles to work together to lower your Real Cost of Ownership. Available in the Freightliner **Cascadia Evolution**.

455 TO 505 HP

DETROIT **DD15**

DETROIT **DT12**

DETROIT FRONT AND REAR AXLES

Detroit DD15 Engine can cruise at the same road speed at lower RPM's reducing fuel consumption and friction. This is made possible by integrating our fastest-ever tandem axle and made easy with our smooth-shifting **DT12 Transmission**. The DT12 Transmission links the engine to the axles.

With direct drive, the DD15's power isn't wasted while cruising in top gear. The **6x4 tandem axles** are integrated specifically with the downsized DD15 and DT12, to give you the performance, power and fuel economy you need. Visit our website for more details: **www.LonestarTruckGroup.com**
